

How to Help Your Lights Last Longer

- As soon as you notice a bulb has burned out, replace it. This will extend the overall life of the light set.
Many spare bulbs have been included with your tree. They may be found in small plastic bags attached to each light set where it plugs into the extension cord on the trunk. (We recommend leaving them intact so they are easily available for replacement.)
- Don't put your tree away hot!
Allow the lights to settle and rest for at least 30 minutes. This will protect them from cracking and breaking.
- Store your tree in a dry and cool place.
